WHITE & CASE LLP
6633 W FIFTH STREET, SUITE 1900
LOS ANGELES, CA 90071-2007

1 **I. INTRODUCTION**

2 The Motion shows that the Amended Complaint has not and cannot plead the auto-dialer
 3 element of Plaintiff's TCPA claim.¹ First, the Amended Complaint cannot directly allege
 4 GroupMe used an auto-dialer. The Amended Complaint's well-pleaded allegations refute that
 5 Plaintiff's telephone number was randomly generated or sequentially dialed. Second, the
 6 Amended Complaint cannot allege the use of an auto-dialer on information and belief. Such an
 7 allegation is only permissible when supported by well-pleaded allegations that show the relevant
 8 text messages were "generic" and "impersonal advertisements" sent by someone who had no
 9 reason to contact Plaintiff. Here, to the contrary, Plaintiff's text messages were social and
 10 personalized. They were not arbitrary and, as such, prevent Plaintiff from making allegations
 11 sufficient to support a reasonable inference that GroupMe used a machine with the "capacity" to
 12 randomly generate or sequentially dial telephone numbers.

13 The Motion shows that dismissal or stay of the action is appropriate under the doctrine of
 14 primary jurisdiction. The FCC is the administrative agency charged by Congress with
 15 implementing a regulatory scheme to oversee the TCPA, and it is in the midst of a rulemaking
 16 proceeding to interpret "prior express consent" and "auto-dialer." Those largely unregulated
 17 issues are central not only to this lawsuit and the FCC's parallel proceeding, but also to other
 18 pending TCPA lawsuits, thus implicating the FCC's ability to uniformly administer its TCPA
 19 regulatory scheme. Dismissal or a stay of this action is appropriate to enable the FCC to decide
 20 the statutory terms of art without risking an unguided judicial interpretation that may be contrary
 21 to whatever the FCC eventually decides.

22 The Motion also shows that transfer to the United States District Court for the Eastern
 23 District of Virginia is appropriate for the convenience of the parties and in the interests of justice.

24 Nothing in the Opposition changes what is shown in the Motion. The Opposition
 25 incorrectly characterizes the Motion's grounds for dismissal as arguments that have already been
 26 rejected by other courts. In doing so, the Opposition misapplies the legal standards for pleading a

27 ¹ The TCPA defines an "auto-dialer" as equipment with the "capacity" to randomly generate or
 28 sequentially dial telephone numbers.

1 TCPA claim and for invoking the doctrine of primary jurisdiction. The Opposition also attempts
 2 to support its arguments with authorities that simply do not provide it any support. In sum, the
 3 Opposition's arguments lack merit and the Court should grant the relief requested in the Motion.

4 **II. ARGUMENT**

5 **A. The Amended Complaint Is Insufficiently Pleaded and Must Be Dismissed**

6 The Motion shows that a complaint does not meet Rule 8's pleading requirements unless
 7 its well-pleaded factual allegations, taken with matters judicially noticeable, state a claim that is
 8 "plausible," as opposed to merely "possible." Mtn. at 9-11 (*Ashcroft v. Iqbal*, 129 S. Ct. 1937,
 9 1949 (2009); *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544, 555 (2007)). Conclusory allegations
 10 or bare recitations of a claim's elements are not well-pleaded and must be disregarded. *Id.*
 11 Likewise, ultimate facts pleaded on information and belief do not satisfy Rule 8 unless they are
 12 supported by specific allegations that create a reasonable inference of wrongdoing. *Id.* (*Kemp v.*
 13 *Int'l Bus. Machines Corp.*, 2010 WL 4698490, at *4 (N.D. Cal. Nov. 8 2010)). If, after
 14 disregarding all insufficient allegations, a complaint's well-pleaded factual allegations contradict
 15 an essential element of the plaintiff's claim or, at best, render it just as likely the defendant is not
 16 liable, then the plaintiff has not shown entitlement to relief and the complaint must be dismissed.
 17 *Id. (Iqbal*, 129 S. Ct. at 1950; *Twombly*, 550 U.S. at 570).

18 The Motion shows that a plaintiff asserting a TCPA claim for the unauthorized
 19 transmission of a text message must allege the defendant made the relevant call using an auto-
 20 dialer, *i.e.*, a machine with the "capacity" to randomly generate and sequentially dial telephone
 21 numbers. Mtn. at 9-10 (47 U.S.C. § 227(a)(1); *Knutson v. Reply!, Inc.*, 2011 WL 291076, at *1
 22 (S.D. Cal. Jan. 27, 2011)).

23 A plaintiff can plead the auto-dialer element in one of two ways. First, the plaintiff can
 24 directly plead facts showing the defendant used a machine to randomly generate or sequentially
 25 dial his cellular telephone number. Mtn. at 10 (*Reply!*, 2011 WL 291076, at *1). Second, in the
 26 alternative, a plaintiff can plead the defendant's use of an auto-dialer on information and belief.
 27 *Id.* Pleading an auto-dialer on information and belief is only permissible, however, when the
 28 complaint also asserts specific factual allegations sufficient to allow a reasonable inference that

1 the machine the defendant used had the “capacity” to randomly generate or sequentially dial
 2 telephone numbers. *Id.* Courts in this circuit have found such an inference permissible when
 3 detailed allegations show the defendant (1) sent the plaintiff impersonal text message
 4 advertisements (2) via SMS short code and (3) had no other reason to be in contact with the
 5 plaintiff. *Id.* Without such detailed factual allegations, a complaint fails to “flesh out the
 6 conclusion” that the sender used an auto-dialer and a court cannot make the requisite inference.
 7 *Id; see Abbas v. Selling Source, LLC*, 2009 WL 4884471, at * 3 (N.D. Ill. Dec. 14, 2009).

8 The Motion shows that Plaintiff has not and cannot plead the auto-dialer element of his
 9 claim either directly or on information and belief. First, the well-pleaded allegations in the
 10 Amended Complaint refute any possibility that GroupMe sent the relevant text messages using a
 11 machine’s random number generation or sequential dialing functions. Mtn. at 10 (Am. Compl.,
 12 ¶¶ 10-13). The Amended Complaint alleges that the group creators provided GroupMe with the
 13 putative class members’ telephone numbers, and that GroupMe then used a machine to “send” not
 14 more than 24 putative class members text messages “simultaneously,” “en masse” and “at once.”
 15 *Id.* It follows that none of the putative class member’s telephone numbers could have been
 16 randomly generated by a machine if the group creators provided the numbers to GroupMe. The
 17 group members also could not have been sequentially dialed if GroupMe sent the text messages to
 18 everyone “at once.” *Id.*

19 Second, the content of Plaintiff’s “Poker” group text message conversation prevents a
 20 reasonable inference that GroupMe sent the relevant text messages using a machine with the
 21 “capacity” to randomly generate or sequentially dial telephone numbers. The first text message
 22 Plaintiff received contained his name, the names of his ten friends, the “Poker” group name, and a
 23 unique ten-digit telephone number for the group. Mtn. at 10-11 (Am. Compl., ¶¶ 29, 32-39, 56;
 24 Declaration of Steve Martocci (“Martocci Decl.”), ¶ 28; Request for Judicial Notice (“RJN”) at 4-
 25 5). The subsequent messages were either personalized, social messages exchanged among the
 26 group, or they told Plaintiff how to stop receiving his “Poker” messages. *Id.* Contrary to the
 27 conclusory allegations in the Amended Complaint, the “Poker” text message conversation
 28 Plaintiff received and participated in was not “impersonal” or a “generic advertisement,” and

1 GroupMe was not arbitrarily contacting him. *Id.* Put simply, Plaintiff's text message
 2 conversation lacks the impersonal and random qualities required to reasonably infer that
 3 GroupMe used an auto-dialer. *Id.*

4 The Opposition does not dispute that the Amended Complaint fails to directly allege the
 5 auto-dialer element, *i.e.*, that GroupMe randomly generated or sequentially dialed Plaintiff's
 6 telephone number. The Opposition only argues that the Amended Complaint's auto-dialer
 7 allegation, made on information and belief, is sufficient to establish that element of Plaintiff's
 8 claim. In doing so, however, the Opposition misapplies the relevant pleading standard. It ignores
 9 the *Reply!* case cited in the Motion and incorrectly argues that it is sufficient for Plaintiff to
 10 merely allege the "nature of the text messages received and the method in which those text
 11 messages were transmitted." Opp. at 6. The Opposition's purported "standard" thus neglects
 12 Rule 8's requirement that allegations made on information and belief must permit a **reasonable**
 13 inference that GroupMe sent Plaintiff text messages using a machine with the "capacity" to
 14 randomly generate or sequentially dial telephone numbers. *Reply!*, 2011 WL 291076, at *1-2. As
 15 discussed above, such an inference here is patently unreasonable because the full content of the
 16 "Poker" group conversation contradicts allegations that the relevant text messages were
 17 impersonal or arbitrarily sent to Plaintiff.

18 Further, the authorities cited in the Opposition do not support its purported standard for
 19 pleading the auto-dialer element on information and belief. In fact, most of those authorities
 20 support the Motion. The courts in *Kramer*, *Kazemi* and *Abbas* only permitted the plaintiffs to
 21 plead the use of an auto-dialer on information and belief because the factual allegations there
 22 allowed a reasonable inference that the relevant text messages were impersonal and arbitrarily
 23 sent by the defendants. *Kazemi v. Payless Shoesource, Inc.*, 2010 WL 963225, at *2 (N.D. Cal.
 24 Mar. 16, 2010); *Kramer v. Autobytel, Inc.*, 759 F. Supp. 2d 1165, 1171 (N.D. Cal. 2010); *Abbas*,
 25 LLC, 2009 WL 4884471, at * 3. The *Abbas* court explained this rationale, stating that "the text of
 26 the SMS message [plaintiff] allegedly received clearly suggests that it was from an institutional
 27 sender **without any personalization**. . . . Lastly, there is no indication that [defendant] had any
 28 reason to call [plaintiff]'s number aside from telemarketing purposes." *Abbas*, 2009 WL

1 4884771, at * 3 (emphasis added).

2 The Opposition’s remaining authority on the issue, *Lozano*, allowed a plaintiff to allege
 3 the auto-dialer element of his TCPA claim without also asserting the supporting, detailed factual
 4 allegations required above. *Lozano v. Twentieth Century Fox Corp.*, 702 F. Supp. 2d 999, 1010
 5 (N.D. Ill. 2010). *Lozano*, however, is a district court case from the Seventh Circuit that applies a
 6 pleading standard incompatible with the standard applied in this circuit. *Id.* Its holding should be
 7 disregarded. *See Harper v. Poway Unified School Dist.*, 345 F. Supp. 2d 1096, 1104-05 (S.D.
 8 Cal. 2004) (district courts in the Ninth Circuit apply Ninth Circuit precedent).

9 Finally, the Opposition mischaracterizes the Motion’s grounds for dismissal as an
 10 argument that has been rejected previously, stating “GroupMe contends that dismissal is
 11 warranted because it did not *actually* use the features of an ATDS to send the unauthorized text
 12 message to Plaintiff.” Opp. at 7 (emphasis in original). That is not GroupMe’s position. The
 13 Motion shows that the Amended Complaint has not and cannot plead GroupMe randomly
 14 generated or sequentially dialed telephone numbers. Mtn. at 9-11. The Motion shows that the
 15 Amended Complaint has not and cannot support its auto-dialer allegation, made on information
 16 and belief, with detailed facts to allow a reasonable inference an auto-dialer was used. *Id.*
 17 Indeed, the Motion shows that the Amended Complaint is either devoid of well-pleaded factual
 18 allegations supporting the auto-dialer element of Plaintiff’s claim or, at best, fails to plausibly
 19 allege that element. *Id.*

20 **B. The Court Should Dismiss or Stay this Action Under the Doctrine of Primary**
 21 **Jurisdiction**

22 The Motion shows that a court can dismiss or stay an action under the doctrine of primary
 23 jurisdiction after determining (1) the litigation presents “a particularly complicated issue that
 24 Congress has committed to a regulatory agency,” and (2) the regulatory agency, rather than a
 25 court, should decide the issue in order to protect the integrity of the applicable regulatory scheme.
 26 Mtn. at 11-12 (*Clark v. Time Warner Cable*, 523 F.3d 1110, 1114 (9th Cir. 2008)). Dismissal or
 27 stay of an action under the primary jurisdiction doctrine is particularly appropriate where the
 28 litigation requires resolution of an issue already being “actively consider[ed]” by the agency

1 charged with administering the relevant statute. Mtn. at 12-13 (*Clark*, 523 F. 3d at 1112-1115).

2 **1. Uniform Administration of the TCPA Requires Dismissal or A Stay of**
 3 **This Action Pending Resolution of the Parallel FCC Proceeding**

4 The Motion shows that Congress charged the FCC with “prescrib[ing] regulations to
 5 implement the requirements” of the TCPA, thus giving the FCC comprehensive authority to
 6 administer a uniform regulatory scheme for telemarketing. Mtn. at 14 (47 U.S.C. § 227(b)(2)(C);
 7 RJN, Ex. H (2003 Report and Order, ¶ 183); *Charvat v. EchoStar Sattellite, LLC*, 630 F.3d 459
 8 (6th Cir. 2010). Congress gave the FCC law-making and interpretive authority over the TCPA,
 9 and also the “flexibility to consider what rules should apply to future technologies as well as
 10 existing” ones. Mtn. at 13-14 (47 U.S.C. §§ 227(b), (c); *Charvat*, 630 F.3d at 466-67).

11 The Motion shows that the FCC has implemented a complex regulatory TCPA scheme
 12 over the past twenty years in furtherance of its Congressional charge and, most recently, initiated
 13 an administrative proceeding to determine an issue central to this case -- what constitutes “prior
 14 express consent.” Mtn. at 15 (RJN, Ex. L (2010 Notice of Proposed Rulemaking, ¶¶ 2, 17-20)).
 15 “Prior express consent” is a defense to a TCPA claim, but the statute does not define the phrase
 16 and the FCC has provided limited guidance for interpreting it. *Id.* (47 U.S.C. § 227(b)(1)(A);
 17 RJN, Ex. L (2010 Notice of Proposed Rulemaking, ¶ 17)). The FCC’s only interpretation of “prior
 18 express consent” relevant to auto-dialing cellular telephones is that a person gives the requisite
 19 consent if they “knowingly release their telephone number” without also issuing instructions not
 20 to call. Mtn. at 13-14 (RJN, Ex. G (1992 Report and Order, ¶ 31) and Ex. V (2007 Declaratory
 21 Ruling, ¶ 9)).

22 The FCC has never before adopted regulations clarifying: who must obtain “prior express
 23 consent” from the called party, in what form that consent must be obtained to call a cellular
 24 telephone, or what the consenting party must be told about the consequences of releasing his
 25 telephone number. Mtn. at 15 (RJN, Ex. V (2010 Notice of Proposed Rulemaking, ¶¶ 2, 17-20)).
 26 Those issues are a blank slate, but the FCC has now acknowledged the need for regulation. *Id.*
 27 Its 2010 Notice of Proposed Rulemaking signals that, in order to promote the uniform application
 28 of the TCPA, the FCC has undertaken the administrative process of considering whether “prior

1 express consent” needs to be obtained in a particular form (*i.e.*, written or oral), and whether a
 2 party from whom consent is sought needs to be apprised that he will receive a call upon releasing
 3 his number. Mtn. at 15-16 (RJN, Ex. L (2010 Notice of Proposed Rulemaking, ¶¶ 17, 19)).

4 **a. The FCC Will Address “Prior Express Consent”**

5 The Motion shows that “prior express consent” is a threshold issue in this case. Mtn. at
 6 19. It is an affirmative defense to a TCPA claim and, if GroupMe can show it obtained consent
 7 from Plaintiff and the putative class members, all other issues, including whether an auto-dialer
 8 was used, become irrelevant. *Id.* The Motion further shows that “prior express consent” is
 9 squarely before the Court. The Amended Complaint acknowledges that the group creators
 10 released the group members’ telephone numbers to GroupMe and affirmatively represented they
 11 obtained consent from the group members before sending them text messages. Mtn. at 18-19
 12 (*Clark*, 523 F.3d at 1114-16 and Am. Compl., ¶¶ 13, 34, 36, 40-41). Such behavior comports
 13 with the plain language of the FCC’s existing, binding regulations whereby a person gives prior
 14 express consent to receive a text message when he knowingly releases his telephone number.
 15 Mtn. at 19; *see Wilson v. A.H. Belo Corp.*, 87 F.3d 393, 399-400 (9th Cir. 1996) (district court
 16 cannot “disregard” FCC Declaratory Rulings under Administrative Orders Review Act, 28 U.S.C.
 17 § 2342). GroupMe obtained prior express consent from Plaintiff and the other putative class
 18 members either directly when they signed up for the service or indirectly when they released their
 19 telephone numbers to the group creators. *Id.*

20 Nonetheless, the allegations in the Amended Complaint deny that Plaintiff and the
 21 putative class members gave “prior express consent.” Mtn. at 18-19 (Am. Compl., ¶¶ 34, 36, 40-
 22 41). The Opposition also argues that GroupMe’s reading of the plain language of the FCC’s
 23 interpretation “stretch[es] the concept of express consent to unprecedeted and impermissible
 24 levels.” Opp. at 13. Yet, the Opposition fails to cite authority supporting its position or refuting
 25 GroupMe’s proffered defense. The only support Plaintiff offers in his Opposition for his position
 26 is his own “common sense” and “plain language interpretation of the phrase.” *Id.* at 10-13.

27 The Opposition’s lack of supporting authority (discussed in greater detail below) confirms
 28 the Motion’s showing -- that if the Court does not apply the plain language of the FCC’s binding

1 regulations, then there is no other authority to guide a determination on whether GroupMe
 2 obtained “prior express consent” from group members who provided their telephone numbers to
 3 the group creators. *See e.g., Gutierrez v. Barclays Group*, 2011 WL 579238 (S.D. Cal. Feb. 9,
 4 2011) (acknowledging lack of authority on “prior express consent” for calls to cellular telephones
 5 other than the FCC rules, and resorting to criminal common law principles for guidance). The
 6 FCC, however, is in the process of providing guidance.

7 In fact, commentators on the FCC’s 2010 Notice of Proposed Rulemaking foresee that the
 8 agency’s eventual rules on the form and content of “prior express consent” will address whether a
 9 calling party can obtain consent through an intermediary. A number of those commentators have
 10 urged the FCC to adopt a rule expressly recognizing that a party may have authority to release
 11 another’s telephone number, thereby consenting on that party’s behalf to receive text messages.
 12 Mtn. at 16-17 (RJN, Ex. T (UPS Reply Comments)). Those commentators, like GroupMe, rely
 13 on intermediaries to facilitate the operations of their text messaging services because it would
 14 otherwise be impossible to obtain consent from each individual who, in fact, consents. *Id.*

15 **b. The FCC Will Likely Address the Definition of an “Auto-**
 16 **Dialer”**

17 The Motion shows that the FCC’s current proceeding is likely to adopt regulations
 18 clarifying which modern technologies have the requisite “capacity” to be “auto-dialers.” Mtn. at
 19 17-18. In response to its 2010 Notice of Proposed Rulemaking, the FCC received a significant
 20 number of Comments expressing concern that the absence of regulatory guidance on the term
 21 “capacity” has left open the possibility that many modern consumer electronics, even
 22 smartphones, may fit the TCPA’s definition of an “auto-dialer.” *Id.* (RJN, Ex. U (Wells Fargo
 23 Comments) and Ex. N (JPMorgan Reply Comments)). The Comments, therefore, ask the FCC to
 24 provide some guidance on which modern technologies have the requisite “capacity” of an auto-
 25 dialer, consistent with Congressional intent in enacting the TCPA to regulate telemarketing. *Id.*

26 Thus far, the FCC has not adopted regulations providing broad guidance on what
 27 “capacity” means under the TCPA. The FCC has only applied its telecommunications expertise
 28 on a case-by-case basis to assess the “capacity” of certain technologies that are not analogous to

1 the text messaging technologies implicated here. Mtn. at 15 (2003 Report and Order, ¶ 165). The
 2 FCC's limited regulation in this area has left the definition of "auto-dialer" unworkable as applied
 3 to modern technology, which is illustrated by considering the difficulties that will be faced in
 4 trying to apply the plain meaning of "capacity" to GroupMe's service.

5 GroupMe's technology uses virtual, VoIP ten-digit telephone numbers, enabled to carry
 6 both voice and text message traffic over the Internet, to aggregate the telephone numbers of
 7 individuals who want to exchange group text messages. Mtn. at 3-5 (Martocci Decl., ¶¶ 11-13,
 8 15-17). The group creators provide GroupMe with the individual telephone numbers to
 9 aggregate, and the group creator and group users then provide GroupMe their text message
 10 contents. GroupMe interacts with Twilio to route and deliver the user-initiated messages to their
 11 destinations through unique ten-digit telephone numbers assigned to each group. *Id.* GroupMe's
 12 technology, however, does not initiate the transmissions between group users and it does not
 13 directly contact the telecommunications providers needed to deliver the group's text messages to
 14 cellular telephones. *Id.* GroupMe's technology also is not configured to randomly generate or
 15 sequentially dial telephone numbers. Mtn. at 19 (Martocci Decl., ¶¶ 8-9, 14-16).

16 The plain meaning of "capacity" could be interpreted to make all electronic devices
 17 capable of being reformatted to perform different functions "auto-dialers." That interpretation
 18 would either make the ubiquitous smartphone an auto-dialer (in which case everyday text
 19 messaging behavior would be a TCPA violation), or it would render it nearly impossible for
 20 courts to consistently determine which technologies have the requisite "capacity." For example,
 21 would GroupMe's technology, currently not configured to randomly generate or sequentially dial
 22 telephone numbers, constitute an auto-dialer if it could be completely reprogrammed to do so?
 23 What if the required adjustment was less significant, such as uploading a pre-programmed
 24 software package or activating a dormant function? Would GroupMe's technology conclusively
 25 not be an auto-dialer **only** if it was technologically incapable of being reprogrammed or altered?
 26 Without FCC guidance, courts cannot uniformly determine these "capacity" issues.

27 In sum, both "prior express consent" and "auto-dialer" are terms of art, and applying them
 28 to the facts of this case will raise technical and policy questions about the TCPA's application to

1 increasingly prevalent technologies unlike anything that existed twenty years ago. Not only are
 2 there other TCPA lawsuits pending that implicate these same issues, but the FCC has undertaken
 3 the administrative process in furtherance of the duties given to it by Congress to maintain uniform
 4 application of the TCPA. Just as in *Clark*, the Court here should dismiss or stay the action to
 5 allow the FCC to provide guidance utilizing its expertise. Mtn. at 20-21.

6 **2. The Opposition's Arguments Lack Merit**

7 Plaintiff first opposes the application of the primary jurisdiction doctrine by arguing that
 8 the Court is competent to decide the issues already before the FCC. Opp. at 8-12 (“conventional
 9 experience of judges” is one of the four relevant factors). In making that argument, however, the
 10 Opposition does not apply the Ninth Circuit’s traditional four factors. Rather, it relies on Second
 11 Circuit law and a dissenting opinion from a Ninth Circuit case where the majority did not even
 12 discuss or rule on primary jurisdiction. Opp. at 8-9 (*Maronyan v. Toyota Sales, U.S.A., Inc.* --
 13 F.3d --, 2011 WL 4359907, at * 9 (9th Cir. Sept. 20, 2011)); *Clark*, 523 F.3d at 1114.
 14 Respectfully, the undoubted competence of the Court is not invoked in this analysis and the
 15 factors advanced by the Opposition are not the law in this circuit.

16 Plaintiff also argues that the primary jurisdiction doctrine cannot be applied if he would be
 17 prejudiced by a stay of the action. Opp. at 16-17. Plaintiff is unable to cite a Ninth Circuit case
 18 to support that proposition, however, and can only cite to a single district court case that pre-dates
 19 *Clark*. *Id. (Natural Defense Council v. Norton*, 64 ERC 1718, at *14 (E.D. Cal. Jan. 3, 2007)).
 20 Even assuming *arguendo* that prejudice is relevant (which it is not), Plaintiff incorrectly argues
 21 that he would be left without recourse in the event of a stay and that GroupMe would “continue to
 22 harm consumers.” Opp. at 16-17. If Plaintiff wants to “protect” himself and other “consumers”
 23 against alleged TCPA violations before the conclusion of the FCC’s parallel proceeding, he can
 24 initiate an enforcement action directly with the agency based on the allegations in this case. R.J.N.,
 25 Ex. G (1992 Report and Order, ¶ 55 (citing 47 U.S.C. §§ 312 and 503(b)). Plaintiff’s recourse is
 26 not limited to a civil action and his bare assertion of “prejudice” does not stand up to scrutiny.

27 **a. There Is Not “Ample Guidance” On “Prior Express Consent”**

28 Plaintiff also contends incorrectly that there is “ample guidance” on “prior express

1 consent” to guide the Court. Opp. at 9-11. To the contrary, “prior express consent” cannot be
 2 read according to its “common sense” and “plain language interpretation.” *See Leckler v.*
 3 *Cashcall, Inc.*, 2008 U.S. Dist. LEXIS 97439, at *6-7 (N.D. Cal. Nov. 21, 2008). “Prior express
 4 consent” is a statutory term of art and courts reading the phrase according to its “unambiguous,”
 5 “discernable, ordinary meaning” have impermissibly run afoul of the FCC’s expert interpretation.
 6 *See Leckler v. Cashcall, Inc.*, 554 F. Supp. 2d 1025, 1028 (N.D. Cal. 2008). Notably, even where
 7 district courts believe the FCC’s interpretation is wrong, those courts must still apply the agency’s
 8 interpretation. *Id.*; *see United States v. Dunifer*, 219 F.3d 1004, 1006-07 (9th Cir. 2000) (28
 9 U.S.C. § 2342 implements jurisdictional bar to reconsidering whether FCC final order applies to
 10 affirmative defenses); *Wilson*, 87 F.3d at 399-400 (9th Cir. 1996); *CE Design, Ltd. v. Prism*
 11 *Business Media, Inc.*, 606 F.3d 443, 448 (7th Cir. 2010) (district court cannot “ignore” FCC
 12 regulations on the TCPA under 28 U.S.C. § 2342).

13 Relatedly, the *Satterfield* court’s reading of “prior express consent” according to Black’s
 14 Law Dictionary does not support Plaintiff’s position that consent must be “clearly and
 15 unmistakably stated.” Opp. at 10. First, the *Satterfield* court never considered the 2007 FCC
 16 Declaratory Ruling.² It was never briefed or argued and the Ninth Circuit did not analyze it under
 17 *Chevron*. *Satterfield v. Simon & Schuster, Inc.*, 569 F.3d 946, 955 (9th Cir. 2009); *Satterfield v.*
 18 *Simon & Schuster, Inc.*, 2007 WL 1839807 (N.D. Cal. June 26, 2007). Moreover, the *Satterfield*
 19 court was seemingly unaware of the FCC 2007 Declaratory Ruling and did not foreclose the
 20 validity of the FCC’s interpretation of “prior express consent” contained therein. *See Nat’l Cable*
 21 *Telecommunications Assoc. v. Brand X Internet Svcs.*, 545 U.S. 967, 982 (2005) (“a court’s prior
 22 judicial construction of a statute trumps an agency construction otherwise entitled to *Chevron*
 23 deference **only if** the prior court decision holds that its construction follows from the
 24 unambiguous terms of the statute and thus leaves no room for agency discretion” (emphasis
 25 added)). As such, the FCC’s interpretation of “prior express consent” remains binding on the
 26

27 ² The FCC issued its 2007 Declaratory Ruling in December 2007. The trial court in *Satterfield*
 28 entered summary judgment for the defendant in June 2007 and the Ninth Circuit issued its
 opinion in 2009.

1 Court and any contradictory or inconsistent interpretation advanced in the Opposition must be
 2 disregarded. *Wilson*, 87 F.3d at 399-400; *CE Design, Ltd.*, 606 F.3d at 448.

3 The *Satterfield* court's holding on "prior express consent" is also factually distinguishable.
 4 *Satterfield* applied "prior express consent" pursuant to a contract whereby the plaintiff agreed to
 5 receive promotions only from "Nextones or its affiliates and brands." *Satterfield*, 69 F.3d at 948-
 6 50. The plaintiff contracted the precise scope of her consent, placing a limitation on who can
 7 obtain it to the exclusion of the defendant who sent the relevant text message, Simon & Schuster.
 8 *Id.* The FCC's 1992 Report and Order and 2007 Declaratory Ruling do not place any
 9 presumptive limitation on who can obtain a called-party's "prior express consent."

10 **b. The FCC Can Define "Auto-Dialer"**

11 Plaintiff further argues that the FCC "has no authority to refine the meaning of 'ATDS'"
 12 because the TCPA itself expressly defines that term." Opp. at 14. That position ignores the fact
 13 that the FCC can determine the technical definition of "capacity" just as it has interpreted "prior
 14 express consent," and can also determine whether particular technologies fall within the TCPA's
 15 definition of "auto-dialer." *See RJN, Ex. H* (2003 Report and Order, ¶ 165). The argument also
 16 ignores the fact that any FCC final order interpreting "auto-dialer," whether or not ultimately
 17 correct or contrary to the statute's plain language, cannot be challenged in this Court and would
 18 be binding in this action. *See Leckler*, 2008 U.S. Dist. LEXIS 97439, at *6-7.

19 Finally, Plaintiff argues that primary jurisdiction should not apply because it is
 20 "implausible the FCC will ultimately issue a rule" that is more favorable to GroupMe than the
 21 current regulations. Opp. at 13-14. Plaintiff misapprehends the primary jurisdiction doctrine.
 22 Speculation, such as whether the FCC could adopt regulations favorable or otherwise to
 23 GroupMe's defense, does not determine whether the doctrine applies. Rather, the focus is on the
 24 fact that the FCC has exercised the authority vested in it by Congress to initiate a parallel
 25 proceeding that will consider novel telecommunications issues central to this case. Those issues
 26 have broad implications for the FCC's TCPA regulatory scheme and require the agency's
 27 expertise. Therefore, the Court should dismiss or stay this case to allow the administrative
 28 agency process to proceed while avoiding the risk of inconsistent rulings. Mtn. at 12-21.

1 **C. In the Alternative, This Action Should be Transferred to the Eastern District**
 2 **of Virginia Pursuant to 28 U.S.C. Section 1404(a)**

3 The Motion shows that a court can exercise its discretion to transfer a case to “any other
 4 district or division where it might have been brought” “to prevent the waste of time, energy and
 5 money and to protect litigants, witnesses, and the public against unnecessary inconvenience and
 6 expense.” Mtn. at 21-22 (28 U.S.C. § 1404(a); *PRG-Schultz USA Inc. v. Gottschalks, Inc.*, 2005
 7 WL 2649206, at *2 (N.D. Cal Oct. 17, 2005)). To determine whether such a transfer is
 8 warranted, a court must first determine whether the action could have been brought in the
 9 district to which transfer is sought. Mtn. at 22-23 (*Fabus Corp. v. Asiana Express Corp.*, 2001
 10 WL 253185, at *1 (N.D. Cal. Mar. 5, 2001)). If venue would have been proper in that district,
 11 the court must then weigh the *Jones* factors identified in the Motion. Mtn. at 22 (*Jones v. GNC*
 12 *Franchising, Inc.*, 211 F. 3d 495, 498-99 (9th Cir. 2000); *PRG-Schultz*, 2005 WL 2649206, at
 13 *2; *Saleh v. Titan Corp.*, 361 F. Supp. 2d 1152, 1156 (S.D. Cal. 2005)).

14 The Motion shows that venue in this case would have been proper in the Eastern District
 15 of Virginia. Plaintiff is a Virginia domiciliary and both GroupMe and Twilio maintain
 16 operations there, thus subjecting them to personal jurisdiction in that district. Mtn. at 22-23
 17 (Am. Compl., ¶ 2; Martocci Decl., ¶¶ 18, 24-28, 30; RJD at 1, 4-5). The Motion further shows
 18 the *Jones* factors weigh in favor of transfer to that district.

19 **1. The Jones Factors Weigh In Favor Transfer**

20 The Motion shows that Plaintiff’s choice of forum should be given little weight, if any.
 21 Plaintiff does not allege contacts with California other than suing Twilio, and most, if not all, of
 22 the operative facts alleged in the Amended Complaint occurred on the east coast, in either
 23 Virginia or New York. Mtn. at 21-22 (*Lou v. Belzberg*, 834 F.2d 730, 739 (1987); *Alexander v.*
 24 *Franklin Res., Inc.*, 2007 WL 518859, at * 3 (N.D. Cal. Feb. 14, 2007); *PRG-Schultz*, 2005 WL
 25 2649206, at * 2; *Fabus Corp.*, 2001 WL 253185, at * 1). Specifically, Plaintiff is a Virginia
 26 domiciliary and exchanged the relevant text messages in this case with his friends on their
 27 Virginia cellular telephones. Mtn. at 22-23 (Am. Compl., ¶ 2; Martocci Decl., ¶¶ 28, 30; RJD at
 28 1, 4-5). Twilio and GroupMe are both Delaware corporations, and GroupMe and its personnel

1 are located in the tri-state area. Twilio and GroupMe's respective servers, utilized to transmit
 2 the "Poker" group text message conversation, are both located in Virginia. Mtn. at 23 (Martocci
 3 Decl., ¶¶ 18, 24-25).

4 Plaintiff could have filed this lawsuit in his home state of Virginia or potentially in New
 5 York. The relevant events would have happened nearby and most of the key witnesses and
 6 evidence would likewise have been easily accessible. Mtn. at 23-24 (Am. Compl., ¶ 1; RJN at
 7 1; Martocci Decl., ¶¶ 22-26; Hawk Decl., ¶¶ 2-6). Instead, without sufficient explanation,
 8 Plaintiff chose to sue on behalf of a putative class in California, where he has minimal contacts.
 9 This suggests forum shopping, and Plaintiff's choice of forum should be disregarded or, at best,
 10 given minimal consideration.

11 The Motion shows that the remaining *Jones* factors -- the locations of the key witnesses
 12 and evidence, the availability of compulsory process, ease of access to proof, and the congestion
 13 of the respective districts -- all weigh in favor of transfer. Most important among these factors,
 14 the non-party witnesses, are located in Virginia, where it would be more convenient for them to
 15 attend the trial and where they would be subject to compulsory process. Mtn. at 24 (*Saleh*, 361
 16 F. Supp. 2d at 1160).

17 **2. The Opposition's Arguments Do Not Change The Balance of the *Jones***
 18 **Factors**

19 The Opposition does not dispute the Motion's standard for analyzing a request for transfer
 20 under *Jones*. It does not dispute that Plaintiff's "Poker" text message conversations with the
 21 group members occurred using cellular telephones with Virginia telephone numbers. It does not
 22 dispute that Plaintiff's "Poker" group members are likely located in Virginia. It does not dispute
 23 that Plaintiff, himself a Virginia domiciliary, has very minimal contacts with California and could
 24 have filed this lawsuit in the Eastern District of Virginia. Opp. at 20. Instead, attempting to shift
 25 the entire focus of this analysis to Twilio's presence in this district and California's purported
 26 interest in adjudicating this dispute irrespective of the fact that most of the evidence and the
 27 witnesses are located in New York and Virginia, Plaintiff claims he is not forum shopping and
 28 transfer is inappropriate. Opp. at 19-25.

1 The Opposition's arguments, however, which seek support in large part from cases
 2 deciding issues of personal jurisdiction, do not change the fact that Plaintiff has minimal contacts
 3 with California and that the bulk of the relevant evidence and witnesses, particularly non-party
 4 witnesses, are located on the east coast. *See e.g.* Opp. at 20 (*Duffy v. Scott*, 2008 WL 2168902, at
 5 *5 (N.D. Cal. May 23, 2008); *Covad Communications Co. v. Pacific Bell*, 1999 WL 33757058, at
 6 *8 (N.D. Cal. Dec. 14, 1999)). Most notably, the Opposition glosses over the fact that Plaintiff's
 7 "Poker" group members, who are not parties to this case, are in Virginia. Opp. at 22-23. Without
 8 any explanation, Plaintiff claims that any depositions of those individuals would be "redundant
 9 and unnecessary," but as shown in the Motion, those individuals may have information about
 10 Plaintiff's "Poker" group that is relevant to this litigation. *Id.* GroupMe also may, depending on
 11 their testimony, want to subpoena them for trial. At present, they are beyond the subpoena power
 12 of the Court. Opp. at 22-23. Many other relevant witnesses, albeit party witnesses, are from the
 13 tri-state area and would more easily be able to attend proceedings in Virginia. *Id.*

14 In sum, Twilio's presence in San Francisco does not tilt the balance of the *Jones* factors
 15 against transfer. The vast majority of the relevant events happened on the east coast, where the
 16 evidence and the witnesses are located. Plaintiff's decision to file in this district should not keep
 17 the case here when Plaintiff and his case lack significant contacts with California.

18 **III. CONCLUSION**

19 For the reasons shown in the Motion and herein, GroupMe respectfully requests that the
 20 Court dismiss the Amended Complaint with prejudice for failure to state a claim, dismiss or stay
 21 the action pursuant to the doctrine of primary jurisdiction, or, in the alternative, transfer the
 22 action to the Eastern District of Virginia, Richmond Division.
